2-Arm Universal Pullers with Induction Hardened Spindle and Galvanized Finish

PRODUCT DETAILS

- Universal two-arm pullers
- Made of special steel
- Galvanised finish
- By reversing the arms, the extractor can be used internally or externally
- Strong design with large claw surfaces
- Body, arms and links are drop forged
- Wear-resistant, induction hardened spindles starting in size C
- 4532K Pair of spare arms
- 4532LK Pair of long spare arms
- 4532/S Spare spindle
- Large claw surfaces offer many advantages for careful and quick removal of pulleys, gears and ball bearings
- Externally-internally reversible by relocating arms
- Finish: Galvanised, with induction hardened spindle, from 4532-C, D, E, F, G and H
- Arms always grip parallel to each other
