

H

Tungsten Carbide Flame Rotary Burrs for Metal

PRODUCT DETAILS

- For deburring of large curved surfaces and inside tubes
- Special cutting edge suitable for soft materials
- Application areas encompass machining cast iron, cast steel, carbon steel, alloy steel, stainless steel, hardened steel, copper and aluminium
- DIN: FLH
- Medium: for machining hard and/or tough materials under normal conditions
- AL-Cut: for machining aluminium, wax should be used to avoid chip build-up
- X-Cut: for hard and soft materials, produces short and blunt chips, runs smoothly even at low cutting speeds
- Stock standard: X = yes
- Indispensable tool, used in large number of industrial sectors including aviation, shipping, automotive and the chemical industry etc.
